The coefficient of restitution (COR), also denoted by (e) , is the ratio of the final to initial relative velocity between two objects after they collide.

Coefficient of restitution - Wikipedia

A railgun is a device that uses electromagnetic force to launch high velocity projectiles, by means of a sliding armature that is accelerated along a pair of conductive rails. It is typically constructed as a weapon, and the projectile normally does not contain explosives, instead relying on the projectile's high speed to inflict damage.

Railgun - Wikipedia

Operations management, with its widened scope, is responsible for the management of productive systems,

that is, it is responsible for systems which either create goods or private service or both.

Todaylibrary - Digi-ED

Welcome to the Frequently Asked Questions (FAQ) page. This page is designed to be your first approach in finding answers to common questions on mixing zones and how CORMIX models them.
