

circumference and arc length pdf

Arc length is the distance between two points along a section of a curve. Determining the length of an irregular arc segment is also called rectification of a curve.

Arc length - Wikipedia

Formulas for Arc Length It helps to think of a pizza when working with these types of problems. The arc length is the length of the crust on the piece of pizza you get.

The distortion is a simple rotation of just 17 degrees, but the results are not very nice at all. First of all each new pixel location is a floating point value, but pixels can only exist in an integer grid, so the above simply junks the non-integer fraction of the results.
