Climate change mitigation consists of actions to limit the magnitude or rate of long-term global warming and its related effects. Climate change mitigation generally involves reductions in human (anthropogenic) emissions of greenhouse gases (GHGs). Mitigation may also be achieved by increasing the capacity of carbon sinks, e.g., through ...

5000 years ago, the world was a very different place. It was a time of great discovery and exploration. The world was a vast and uncharted territory, and people were constantly seeking new lands and resources. The world was a place of great potential and opportunity, and it was a time of great hope and optimism.

### ... and the world is a very different place today.

I have lived in the USA from 1986-1991 and from 2002 to today and there is no doubt in my mind whatsoever that the country has undergone a "huge" decline over the past decades.
