In mathematics, the characteristic equation (or auxiliary equation) is an algebraic equation of degree n upon which depends the solution of a given n th-order differential equation or difference equation.

Characteristic equation (calculus) - Wikipedia

For a plane curve C and a given fixed point O , the pedal equation of the curve is a relation between r and p where r is the distance from O to a point on C and p is the perpendicular distance from O to the tangent line to C at the point.

Pedal equation - Wikipedia

Editor’s note: Dr. Gordon Clark gave this lecture titled “The Logos” to the teachers at Chattanooga Christian School in Chattanooga, Tennessee, in 1984, the same year that The Biblical Doctrine of Man was published.

The Trinity Foundation - The Logos

Flow in piping generally has random frequency characteristics. However, a particular frequency component may become dominant when a change of flow interacts with fluid machinery such as compressors and pumps, as well as equipment such as valves, branch pipes, and perforated plates.
