With Discovering Geometry, students gain experience with both inductive and deductive reasoning. They use inductive reasoning when they perform investigations and make conjectures, and begin deductive reasoning informally with exercises that ask them to "explain why." Examples of algebraic, paragraph, and flowchart proofs are modeled early.

### **Discovering Geometry: Teaching with Discovering Geometry**

Discovering Geometry helps students internalize geometric properties as they develop their intuition with physical models and build their inductive and deductive reasoning ability by reporting and justifying their conclusions. With Discovering Geometry, you will meet your students where they are and guide them all to the high level of understanding required by today's rigorous standards ...

The Law of Syllogism states (in symbolic form): If  $p \rightarrow q$  and  $q \rightarrow r$  are true statements, then  $p \rightarrow r$  is a true statement. This is much easier to understand. It is exactly what Sherlock did. If ...
