Given the attention around additive manufacturing (AM), organizations want to know if their products should

be fabricated using AM. To facilitate product development decisions, a reference system is shown describing the key attributes of a product from a manufacturability stand-point: complexity, customization, and production volume.

Making sense of 3-D printing: Creating a map of additive

Middle Tennessee State University unites the closeness of a small college with the opportunities of a large dynamic public university where students explore their intellectual potential and realize the promise in their futures.
