At this high-profile conference we looked at the digital transformation and the disruption it may cause in various fields. Consisting of four panels, the event provided a platform to look at 4 different aspects of the digital age: industrial policy, competition policy, Internet of things, and sustainability.

The ECB’s market-neutral approach to monetary policy undermines the general aim of the EU to achieve a low-carbon economy. An alternative tilting approach would foster low-carbon production, accelerating the transition of the EU to a low-carbon economy, and could be implemented without undue interference with the chief aim of price stability.
