Scrum is an agile framework for managing knowledge work, with an emphasis on software development, although it has wide application in other fields and is slowly starting to be explored by traditional project teams more generally. It is designed for teams of three to nine members, who break their work into actions that can be completed within ...

Scrum (software development) - Wikipedia

This is the compulsory bit! Must have three things, and the first one is a master list. Everything, all written down, in one place. What happens if you don't. Stress, reactive, unable to plan. What it might physically be like. Minimal time required! What goes on your master list - one off projects. No need to know when you will do them.

Use a master list - lynda.com
