

## **mole and chemical composition pdf**

Academia.edu is a platform for academics to share research papers.

### **(PDF) Percent Composition: Concentration Calculations**

In chemistry, the mole fraction or molar fraction ( $x_i$ ) is defined as the amount of a constituent (expressed in moles),  $n_i$ , divided by the total amount of all constituents in a mixture (also expressed in moles),  $n_{\text{tot}}$ : = The sum of all the mole fractions is equal to 1:
