What is evolution? Evolution is a result: heredity + variation "Descent with modification" Fact: evolution has occurred Began as a hypothesis

Molecular & Cell Biology - nyu.edu

The overall theme of the research in my lab is detecting the effects of natural selection on nuclear genes. This includes detecting the effects of balancing selection and directional selection on variation within populations, variation among populations, and variation among species, and it includes

John H. McDonald's home page - University of Delaware

Non-Mendelian inheritance is any pattern of inheritance in which traits do not segregate in accordance with Mendel's laws. These laws describe the inheritance of traits linked to single genes on chromosomes in the nucleus.

Non-Mendelian inheritance - Wikipedia
