c) This is a very difficult question to answer with just words. I assume you are looking for the valence bond theory approach (sp², sp³ hybrid orbitals) rather than the molecular orbital approach (which would be extremely difficult to do without a computer).

(Solved) - How many hybrid orbitals do we use to describe

Such format suits best for low molecular weight compounds which cannot bind two antibodies simultaneously. Absence of color at test line is an indication for the presence of analyte while appearance of color both at test and control lines indicates a negative result.
