This video points out some of the bias that women scientists face, particularly when their work challenges the existing paradigm. Dr. Goodall was the first to observe chimps in the wild making and using tools, and this was a shock to those who had used tool-making as a defining property of humanity.

A double bubble is pair of bubbles which intersect and are separated by a membrane bounded by the intersection. The usual double bubble is illustrated in the left figure above. A more exotic configuration in which one bubble is torus-shaped and the other is shaped like a dumbbell is illustrated at right (illustrations courtesy of J. M. Sullivan).
