Welding is a fabrication or sculptural process that joins materials, usually metals or thermoplastics, by using high heat to melt the parts together and allowing them to cool causing fusion.

### **Welding - Wikipedia**

Energy Heats Maine Lesson 5 Â© 2009 G 3 radiation. Students should recognize that heat transfers, occurring in a variety of ways, can be used to explain everyday ...

### **Lesson 5: Conduction, Convection, Radiation - Power Sleuth**

Student teams design and build solar water heating devices that mimic those used in residences to capture energy in the form of solar radiation and convert it to thermal energy. This thermal energy is next transferred to water (to be used as domestic hot water) in the form of heat. Once the model devices are constructed, students perform ...

Students learn about the techniques engineers have developed for changing ocean water into drinking water, including thermal and membrane desalination. They learn how processes can be viewed as systems, with unique objects, inputs, components and outputs, and sketch their own system diagrams to describe their own desalination plant designs.
