Iron filings will line up parallel to a magnetic field, making the pattern of the field visible. This is a simple Snack to build—and because the filings are trapped in a bottle, they don't make a mess.

Our in-depth three-day program includes presentations by experienced amateur astronomers and professional astronomers. These presentations will teach you about the hardware and software used by amateurs and introduce you to the kinds of projects you can do as an amateur and how to contribute to pro / am collaborations.

A piece of iron ordinarily will be attracted to a magnet, but when you heat the iron to a high enough temperature (called the Curie point), it loses its ability to be magnetized. Heat energy scrambles the iron atoms so they can't line up and create a magnetic field—this Snack is a simple demonstration of this effect. CAUTION: Electricity ...
